Slide title

Write the main point here.

- First point
- Second point

Nested headings

Main topic

Text belonging to the main topic.

Subtopic

Text belonging to the subtopic.

Detail

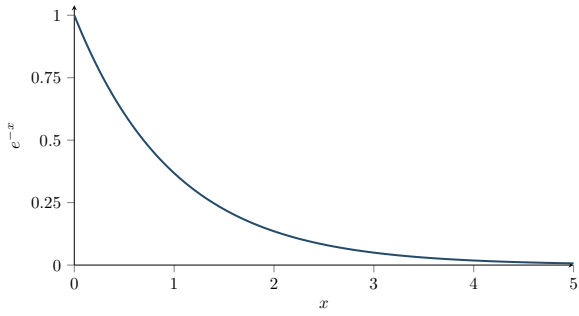

Text belonging to the detail.

Next topic

Another topic at the same level as the first.

Image and text

The function $f(x) = e^{-x}$ decreases from 1 toward 0.

PVS

```
counter: THEORY
BEGIN
  state: TYPE = [# value: nat, ready?: bool #]

  step(s: state): state =
    s WITH [value := s`value + 1]

  % Each step increases the value.
  grows: LEMMA
    FORALL (s: state): step(s)`value > s`value
END counter
```

SAL

```
toggle: CONTEXT =
BEGIN
  system: MODULE =
  BEGIN
    OUTPUT on: BOOLEAN
    INITIALIZATION on = FALSE
    TRANSITION
      [ flip: TRUE --> on' = NOT on ]
  END;

  % The next state reverses the output.
END
```
